AIES Engineering

PROJECT AREA
100,000 SF

LOCATION
750 Folsom St, San
Francisco, CA 94107

COMPLETION DATE
Jun 2025

ONVERGENT
CONSTRUCTION

PROJECT SCOPE
Scope included design – build to retrofitting two existing Dectron humidification units (5700 CFM each) serving the ice rink arenas. Mechanical work covered removal and replacement of internal components, duct modifications, insulation, and full system commissioning to improve performance and efficiency. The project also involved architectural and MEP work, including suspended ceiling tile replacement, fire sprinkler adjustments, painting, and replacement of light fixtures in impacted areas.
